

## Call for Resumes – Southern Africa Resilience in the Limpopo River Basin

DAI works at the cutting edge of international development, combining technical excellence, professional project management, and exceptional customer service to solve our clients' most complex problems. Since 1970, DAI has worked in 150 developing and transition countries, providing comprehensive development solutions in areas including crisis mitigation and stability operations, democratic governance and public sector management, agriculture and agribusiness, private sector development and financial services, economics and trade, HIV/AIDS, avian influenza control, water and natural resources management, and energy and climate change. Clients include international development agencies, international lending institutions, private corporations and philanthropies, and host-country governments.

DAI seeks candidates for an anticipated Southern Africa Resilience in the Limpopo River Basin program. The anticipated program will work in South Africa, Mozambique, Botswana, and Zimbabwe. The program aims to increase to assist regional, national and local stakeholders to improve transboundary management of the Limpopo River Basin resulting in the enhanced resiliency of people and ecosystems through three main objectives: 1) Reduce climate vulnerability by promoting adoption of science-based adaptation strategies; 2) Conserve biodiversity and sustainably manage high-priority ecosystem; and 3) Build the capacity of stakeholders to sustainably manage water and biodiversity resources.

\*This position is for submission in an upcoming proposal and is contingent upon successful award of funding.

DAI is seeking candidates with the following areas of expertise:

- Climate change adaptation
- Hydro-climate monitoring
- Transboundary natural resource management
- Transboundary water management/shared watercourse management, integrated water resources management, ecosystem-based water management
- Community-based natural resource or forest management/local-level natural resource stewardship
- Biodiversity threats analysis, biodiversity threat mitigation
- Capacity Building/Training
- Monitoring and Evaluation
- Communications
- International donor program administration, operations, finance, and procurement

Qualifications Required:

- Advanced degree in technical area related to natural science, resource management, environmental studies, water management, ecology, or other technical area mentioned above preferred.
- Minimum of five-seven years in related field of interest.
- Exceptional interpersonal and communications skills in English.
- Experience in one or more (preferably more) of the 4 countries in the Limpopo River Basin

- Policy and planning experience.
- Experience with stakeholder participation, dialog, exchanges and partnerships.
- Experience on sharing best practices/learning.
- Citizens of Botswana, South Africa, Mozambique, and Zimbabwe are encouraged to apply.
